

Setting the Pace of
Connected Vehicle Innovation

Airbiquity[®]

Most People See a Car. We See a User Experience

Today's tech-savvy drivers increasingly expect their vehicles to seamlessly deliver useful features and services, personalized content, and over-the-air updates just like their other mobile devices. In other words, they see their vehicles as an extension of their digital lifestyles and electronics experiences—not just a means of getting from one place to the next. But behind the scenes, cutting-edge connected vehicle programs rely on a dizzying array of specialized telematics technologies, cloud platforms, extended ecosystems, and back-end management tools to ensure reliable and manageable service delivery 24/7 anywhere around the world.

Deployment Proven Connected Vehicle Service Provider

Airbiquity® is a global leader in connected vehicle service delivery and pioneer in the development and engineering of automotive telematics technology. We offer automotive customers innovative software development, technology integration, and program deployment expertise. Our solutions are designed to best meet the management, control, security, and business model needs of automakers and automotive suppliers alike.

Company Highlights

- Over 25 million vehicles licensed with Airbiquity technology
- Over 11 million vehicles subscriptions since inception
- Over 12 million TCU/HU over-the-air (OTA) software updates
- Service availability in 60+ countries and 30+ languages
- 1st Data-over-voice modem for digital cellular networks
- 1st Cloud-based service delivery platform deployment
- 1st Global infotainment delivery program deployment
- 1st Regional fuel management fleet deployment
- 1st Global electric vehicle program deployment

Deployment Options

Airbiquity solutions can be deployed using a managed service model or technology license model to best meet the management and business requirements of automakers and automotive suppliers.

Managed Service

Technology License

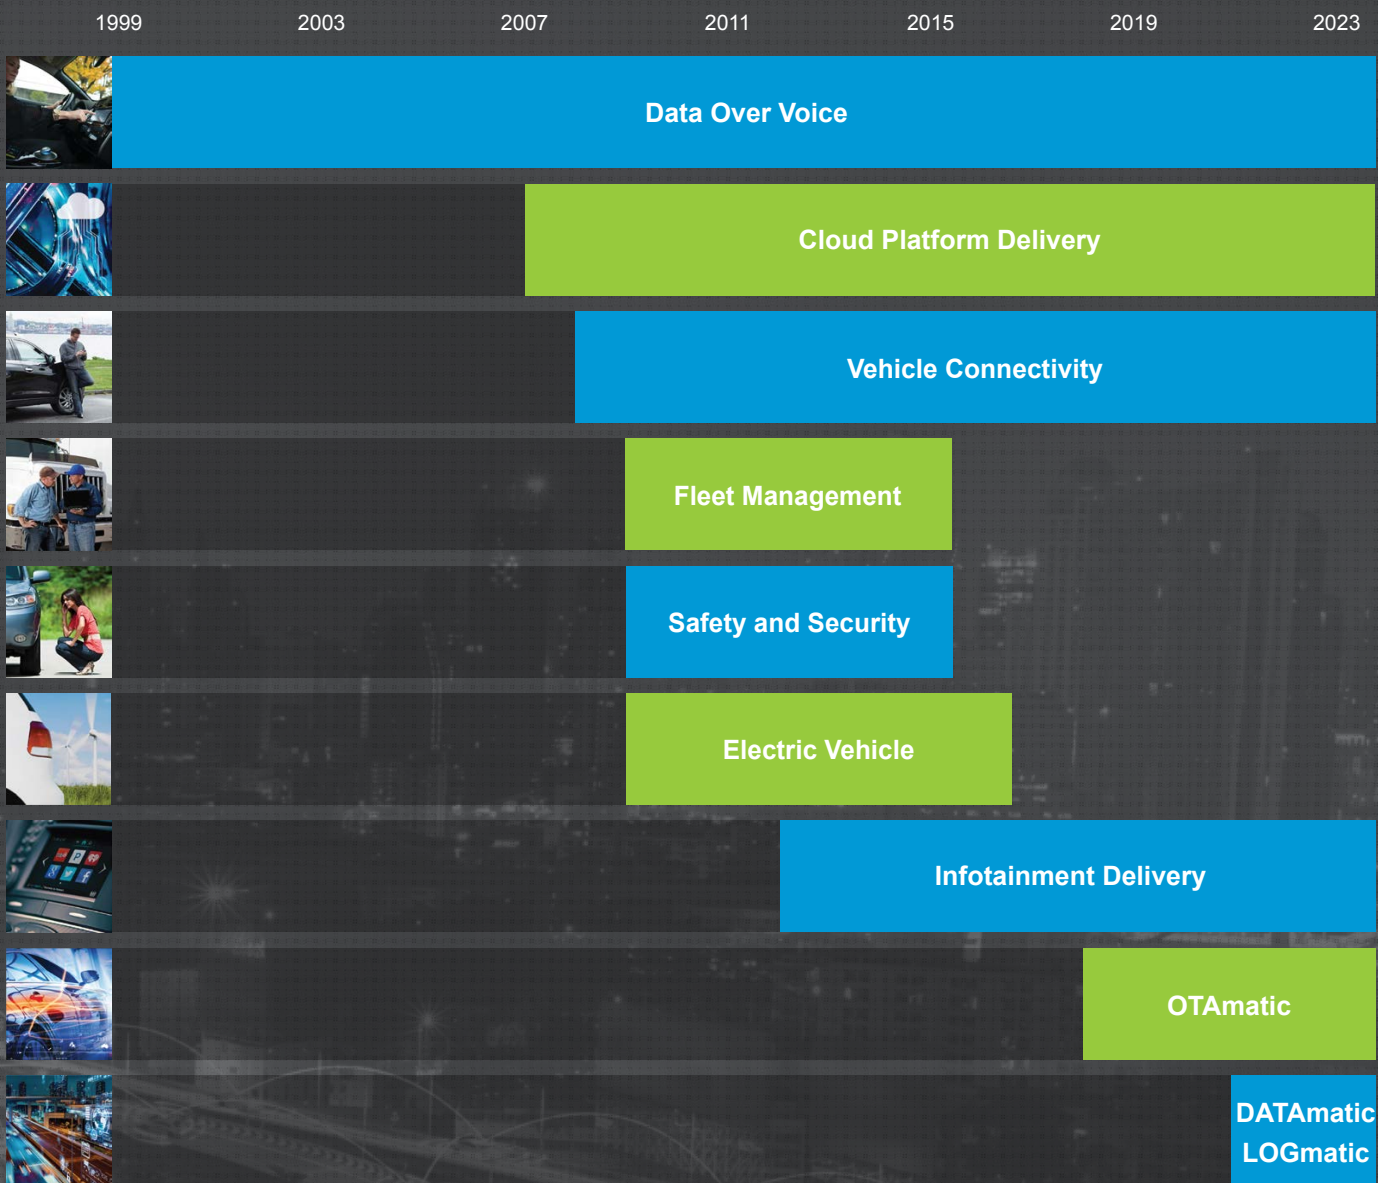

Manageability that Scales

Working in partnership with Airbiquity, our customers build, deploy, and scale highly manageable connected car services meeting the safety, convenience, information, and entertainment needs of their customers around the world—as well as the back-end service management and operational needs of their own businesses.

Program Experience

- **Data Over Voice:** Data communications over digital wireless voice networks
- **Service Management:** Foundational service integration, deployment, and control
- **Fleet Management:** Commercial fleet operation and efficiency optimization
- **Safety & Security:** Crisis, convenience, and security assistance
- **Electric Vehicle:** Electric, PHEV, and hybrid driving efficiency
- **Infotainment Delivery:** Personalized entertainment, news, and information content
- **OTAmatic®:** Orchestrated, automated, and secure OTA software updates
- **DATAmatic™ Edge Data Platform:** Comprehensive and secure edge analytics and dynamic data acquisition
- **LOGmatic™ Data Logging Platform:** Secure, configurable, dynamic data logging and transmission
